 Yin-Yun-Li | r15323012@ntu.edu.tw | Taipei, Taiwan

EDUCATION

National Taiwan University

M.A. in Economics

Taipei, Taiwan

Sep 2026–Present

B.A. in Economics

Sep 2021–Jun 2026

Double Major in Political Science, Public Administration Division

- GPA: 4.12/4.3 overall; 4.26/4.3 in economics coursework
- Dean's List Award: Fall 2022, Fall 2024, Spring 2025 (Top 5% of the department)
- NTU Presidential Award, 2022 (Top 2% of the department)
- Courses: Introduction to Mathematical Analysis, Introduction to Linear Algebra, Labor Economics, Game Theory

FIELDS OF INTEREST

Applied Microeconomics, Labor Economics, Monetary Policy

RESEARCH EXPERIENCE

C2L2 Lab, National Taiwan University

Research Assistant

Taipei, Taiwan

Sep 2024–Present

- Examined how political trust shapes retirees' choice between lump-sum and monthly pension benefits using weighted least squares.

Institute for Social Science Methodology, Academia Sinica

Program Participant

Taipei, Taiwan

Jul 2025

- Received the Professor Jih-wen Lin Scholarship for a research proposal examining the effect of military service reform on subsequent earnings.
- Diagnosed threats to identification in the RD design using survey data, employed an event-study specification as an alternative, and explored how a structural model could extend the analysis.

PROJECTS

Cash or Commitment? Political Beliefs and Pension Decisions in Taiwan

Advisor: Kuan-Ming Chen

Sep 2024–Jul 2026

- Built a 2009–2022 village-level panel for Taiwan by combining administrative pension records, public opinion surveys, and election outcomes.
- Found more lump-sum claims when trust in the incumbent was lower or local political preferences differed from the governing party. The results varied across income levels and population density.
- Calculated that lump-sum recipients would need annual returns of 9.36–12.20% to match the value of the monthly pension. Distrust-driven claims raise short-run cash outflows but reduce the pension system's future liabilities.

SKILLS

Languages: Mandarin (native), English (fluent)

Programming: R, Julia, $\text{\LaTeX}$
